

(SAMPLE WAIVER)

Heat-Treated Glass Waiver To Builder Releasing Window Cleaner From Any Liability For Scratches on Heat-Treated Glass

(This includes both Fully Tempered and Heat-Strengthened glass)

Due to the widespread problems related to poor quality Heat-Treated glass, **Fields Construction Services, Inc.** will not be held liable for any scratches on any heat-treated glass during construction window cleaning.

It is accepted and understood by ALL parties that properly used razor blades and scrapers are standard tools and techniques for construction window cleaning and can safely remove limited amounts of construction debris (plaster, paint, texture, tape, stickers, etc.) from quality glass, without scratching the glass surface.

Furthermore, it is accepted and understood that razor blades and scrapers will be employed on all construction window cleaning and no other cleaning method will be offered by **Fields Construction Services, Inc.** to remove any construction debris from any glass surface.

If Builder does not choose to have window cleaner use razor blades or scrapers, Builder must cover all glass during entire construction process, which would protect glass from any construction debris and could eliminate the need for **Fields Construction Services, Inc.** to use razor blades and scrapers to clean glass.

This clause must be included on all contracts. If this clause is not acceptable, there is no contract between **Fields Construction Services, Inc.** and Builder.

Please sign and date acceptance of this clause.
